Come si pronuncia Linux?

How to pronounce LINUX correctly? L-eye-nix, Lih-nix or Lee-Nooks?

Because there was a debate in the Usenet Newsgroups on how to pronounce the name "Linux". Linus Torvalds in his youthful wisdom clarify it, recorded the correct pronunciation of "Linux" both in English and Finnish(and, inadvertently but fortuitously, of his name pronunciation to).
A .AU audio file of this recording was aviable in the first linux distributions.
